

GROUND SUPPORT AWARENESS

About Us

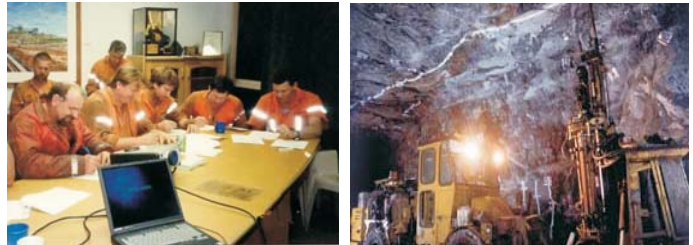

Mining One is an exciting team of highly experienced professional mining, mine geotechnical and geological consultants with a hands on practical approach.

Our courses are presented by experienced personnel who have worked at “the coal face”, speak the same language as mine operators and importantly have managed mining operations.

Our training enables mine operators/staff to provide a safer work environment for themselves and their team. By being better prepared and more informed they are able to solve day-to-day problems that arise. In turn, the training we offer your staff can help to increase productivity positioning our clients for increased long-term profitability.

Client Benefits

- ▶ Provides operators with fundamental principles of how a rock mass behaves
- ▶ Alerts operators to the “Tell Tale” signs of potentially unstable rock and improve their ability to observe and detect bad ground
- ▶ Increases operators understanding of how each type of bolt or other support types work and when they should be used
- ▶ Helps improve employee’s safety
- ▶ A training program which will match and compliment the client’s ground support control management system
- ▶ Suitable for all levels including new starters, jumbo operators, supervisory staff and professional staff

Site Experience

- ▶ Gold Corp Inc - Peak Gold Mine
- ▶ Perilya - Broken Hill
- ▶ Barrick Gold Corp - Lawlers Gold Mine
- ▶ CBH Resources Ltd - Endeavor Mine
- ▶ Homestake Gold - Darlot Gold Mine
- ▶ Tallawang Magnetite Mine
- ▶ Placer Dome Inc - Osborne Mine
- ▶ Northgate - Stawell Gold Mine
- ▶ BHP Billiton - Cannington Mine
- ▶ Newcrest - Telfer Gold/Copper Project

Feedback

A quote from a jumbo operator and his supervisor:

OPERATOR: “Anyone can bang bolts in - I learnt it from the guy who taught me but this is the first time that anyone has explained how or why and what is happening.”

SUPERVISOR: (Speaking about what the operator got out of the course).

“He was full of very positive feedback from many respects. The company is spending some money to improve his knowledge and safety, demonstrates that we are serious about things and confirms from an outside source why we ask them to perform things in a certain manner. I believe that the benefits of holding similar courses in the future are pretty much highlighted by what he said”.
